

Standard Typefaces

Select from the following typefaces if you want us to do the production. We'll be happy to prepare the camera-ready artwork for your materials. Simply give us a detailed description of the design and any special materials you want us to use (logos or trademarks, etc.). For a nominal fee, we will size your artwork, set your copy in the type size and standard typeface you select and layout and paste-up your item before we print your order. You'll save a lot of valuable time and be guaranteed a professional-looking item.

- Be sure to indicate the typeface desired on the order form.
If a tpestyle is not specified, Helvetica 3 will be used.
- If you decide to create your own camera-ready art, you are not limited by this selection.

Type Sizes:

Here is a size comparison from 6 to 48 point type to help you select an appropriate point size.

The following tpestyles available when using ink printing:

NOTE: Font size for tpestyle samples shown at right is 9 point.
